T-Hangars Anyone?

Are you interested in occupying a brand new T-Hangar? The Airport is currently accepting reservations for spaces in it's next 6-unit T-hangar building. The Airport has plans to develop two 6-unit T-hangars in the not so distant future. The hangars will have electric bi-fold doors and full concrete floors. This is part of a T-hangar modernization program that has been identified as a goal of the Airport. The new hangars will replace the rapidly deteriorating D-row of hangars. D-row is schedule to be raised by the end of 2008, once all the aircraft currently hangared in the row are relocated. To reserve a spot contact the airport for details. It is also important to note that the Board is willing to consider alternative methods of construction financing and leasing such as long-term land leases similar to our corporate clients. We are very interested in completing the East T-hangar complex so lets put our heads together and build some T-hangars...

In The News...

Welcome to Century Aviation!!

Please join us in welcoming

Century Aviation

as the newest business enterprise on the Airport.

Century will offer flight instruction, aircraft rental, maintenance services and inside storage. They will have office space on the second floor of the main Terminal Building and the 11,500 square foot newly constructed hangar addition to the East of the main hangar. When the downstairs lobby renovations are complete Century will also have counter space. We are working hard to ensure that Century can open its doors for business within the next weeks and will keep you advised with contact information.

Expect a busy construction season!!

Please use caution this spring and summer and listen to the AWOS (124.15 or 925-8225) and check NOTAM's before arrival or engine start. We will keep you advised of all active projects and their locations on the Airport using the voice-over function of the AWOS and/or through the use of the NOTAM system. Some projects you can expect are further pavement maintenance all around the Airport, the removal of the D-row of hangars and the construction of a connecting taxiway to the Rieke ramp.
